## **UW HEALTH JOB DESCRIPTION**

#### **HVAC SPECIALIST**

Job Code: 410037	FLSA Status: Non-Exempt	Mgt. Approval: W. Abbott	Date: 8.2018		
Department: Maintenance & Engineering Services		HR Approval: K. Sawyer	Date: 8.2018		
JOB SUMMARY					

The nature of the services provided by this position may affect UW Health Patients, Visitors, Employees, and other departments. A wide variety of both internal and external relationships is involved in carrying out the duties of this position.

The Heating, Ventilation, Air Conditioning (HVAC) Specialist is responsible for troubleshooting, repairing, adjusting, and modifying HVAC control systems (pneumatic, electric, and electronic equipment). The position is responsible for specialized advanced environmental controls and routine maintenance and repair of the HVAC environmental systems. The position may train operators on workstation procedures used to monitor and control the facility. This position may work in various locations owned or operated by UW Health. The Hospital and Clinic operations environment requires quicker than normal response to system and equipment failures.

## **MAJOR RESPONSIBILITIES**

- Review work orders and individual complaints to locate, identify, and troubleshoot equipment, and system malfunctions.
- Inspect malfunctioning controls or equipment to determine source of problem and decide on appropriate action to correct the problem.
- Install new, and remodel old control, systems, or components.
- Redesign existing controls and equipment for maximum efficiency.
- Balance air and water flow distribution to optimize system performance.
- Read printouts and interpret the information provided to make changes to the computer programs which control the operation of fans, chillers, pumps, dampers, and controls.
- Assist in the determination to incorporate existing systems with new equipment.
- Determine energy management savings and conservation.
- Work with and, at times, direct contractors and vendors hired by UW Health.
- Maintain records and written documentation associated with codes of all applicable local, state, and federal regulatory agencies.
- Maintain and repair pneumatic and electronic control systems.
- Perform HVAC analysis to recognize systems malfunctions, interpret diagrams and make appropriate repairs or adjustments to complete system.
- Review plans and specifications for new and remodeling projects and recommend changes and/or modifications.
- Order supplies using requisition system.
- Perform additional duties as assigned that may include assisting Trades or Maintenance Technicians.

		PERFORMANCE STANDARDS.
