### UW HEALTH JOB DESCRIPTION

INTE	ROPERATIVE NEURON	ONITORING TECHN	OLOGIST I
Job Code: 510031	FLSA Status: Non-exempt	Mgt. Approval: LM	Date: 8/1/18
Department: Neurodiagnostics		HR Approval: KS	Date: 8/1/18
	JOB S	UMMARY	

Under the direction of the Neurodiagnostics Manager, and with direct supervision from the Intraoperative Neuromonitoring Supervisor, the Intraoperative Neuromonitoring Technologist conducts basic evoked potentials as well as observes, learns and assists with more complex intraoperative neuromonitoring procedures. This position is responsible for adhering to the guidelines and technical standards of Intraoperative Neurophysiological Monitoring as set forth by the American Society of Electroneurodiagnostic Technologists. The work is designed to develop proficiency and expertise in the technical aspects of intraoperative neuromonitoring while learning more complex procedures.

The UWHC Interoperative Neuromonitoring Technologist I is a multi-skilled professional who may perform intraoperative procedures including, but not limited to evoked potentials (EP), electroencephalograms (EEG) and electromyography (EMG). This includes working with the patient in all settings; preoperative, intraoperative and postoperative.

The UWHC Interoperative Neuromonitoring Technologist I trains under the direct supervision of senior staff and indirect supervision of a physician who is responsible for interpretation and clinical correlation of the results. This physician may not be physically present during the procedures and so the technologist must be able to analyze data during the recording while ensuring the information being obtained is valid and interpretable. A relevant patient history obtained by the technologist will guide how the test will be conducted; therefore, he/she must be knowledgeable in clinical neurology.

### **MAJOR RESPONSIBILITIES**

## **Clinical Duties and Responsibilities**

- Performs and implements IONM procedures including EP, EEG and EMG under the direct supervision of senior staff in accordance with laboratory protocol to include preoperative checks, intraoperative and postoperative duties for the procedure
- Measures and marks correct recording and stimulation sites, apply electrodes and obtains baseline recording(s).
- Prepares equipment and supplies for required monitoring.
- Identifies correct patient, surgeon and type of procedure(s) to be performed and communicates the monitoring plan to the patient/caregivers/family.
- Monitors neurophysiologic central/peripheral functioning throughout the operative procedure(s) and is able to recognize and communicate clinically significant events.

### Other General Responsibilities

- May be available after-hour calls from medical staff regarding urgently needed IONM procedures. Rotates with other staff in an on call and call in basis.
- Performs and provides assistance with departmental support tasks, goals and functions in accordance with laboratory protocol and procedure.

# ALL DUTIES AND REQUIREMENTS MUST BE PERFORMED CONSISTENT WITH THE UW HEALTH PERFORMANCE STANDARDS.

		JOB REQUIREMENTS
Education	Minimum	Graduation from a Commission on Accreditation of Allied Health Education Program (CAAHEP) accredited Electroneurodiagnostic (END) Program
		OR
		Credential in electroencephalography (R. EEG.T) with at least 2 years of EEG experience
		OR
		Two years combination of training and experience performing IONM procedures
	Preferred	Bachelors of Science from an college or university in a relevant field
Work Experience	Minimum	See Education requirement
